Experience

River Edge Analytics Pvt. Ltd. - Software Development Intern

Jan 2026 – June 2026

Ahmedabad, Gujarat

- Reduced data ingestion time by **90%** by implementing batch insertion strategies for large-scale datasets
- Reduced API response time by **20%** through database indexing and query caching
- Designed and deployed an internal **OCR-based** web application, reducing document processing time by **80%**
- Increased API throughput to **80+ requests/minute** while maintaining low response latency
- Improved data accessibility for remote employees by integrating **AWS S3** as a secure intermediary layer
- Automated subscription reminder emails using **Google Apps Script**, eliminating manual follow-ups

Achievements

- Ranked **5,737 / 33,040 (Top 17%)** in Leet Code Weekly Contest 467
- LeetCode Max Rating: **1492**
- Ranked **6th (Top 0.5 %)** among college peers on GeeksforGeeks
- Solved **500+** Data Structures and Algorithms problems across LeetCode and GeeksforGeeks

Education

Lok Jagruti University | Master's of Computer Applications

July 2024 – June 2026

- CGPA: 8.88 /10.0

Gujarat University | Bachelor's of Computer Applications

July 2021 - June 2024

- CGPA: 7.97 /10.0 ([Graduation Mark sheet](#))

Projects

Project Manager + AI | [GitHub](#) | [Video](#)

June 2026

- Automated conversion of unstructured meeting notes into actionable project tasks using **LLM-based** information extraction with a human approval workflow
- Implemented **Retrieval-Augmented** task reconciliation using **RapidFuzz** candidate matching, human-in-the-loop confirmation, and deterministic structured/unstructured task routing
- Enabled traceable AI-generated task updates by linking every extracted field to its originating meeting note, improving review accuracy and explainability

Career Lens | [GitHub](#)

July 2026

- Engineered a full-stack AI career platform that retrieves real-time job listings via **Exa Labs** and personalizes **recommendations** using resume parsing
- Designed an **ATS** compatibility system that compares resumes against job descriptions, highlighting match scores and missing skills for targeted upskilling
- Built an AI-driven roadmap generator that recommends learning resources, tracks progress, and stores user data in **Neon PostgreSQL**

AI Q&A | [GitHub](#) | [Video](#)

May 2025

- Developed an AI-powered document assistant that enables contextual question answering and semantic document exploration using **Retrieval-Augmented Generation (RAG)**
- Implemented vector embeddings and semantic search using a vector database, improving document retrieval accuracy by up to **81%**
- Reduced average document reading time for users by over **70%** by summarizing and filtering only relevant sections

Skills

Languages: Python, C++, Java

Full Stack: React, FastAPI, Node.js, Express.js, Streamlit, MongoDB, MySQL, SQLite, Redis, REST API, AWS S3

AI: LLMs, Prompt Engineering, RAG, Vector Databases, LangChain, LlamaIndex, Scikit-learn, NumPy, Pandas

Coursework: Data Structures and Algorithms, Machine Learning, DBMS, Operating System, Object Oriented Programming
